

SMART

Learn innovative mentoring and fostering techniques, based on non-formal education to tackle some of the challenges offered by the remote-learning situation. RESET will lead partners in developing the right set of tools, learning materials and exercises needed to foster (ex)VET students skills and competences. All partners will offer their active contribution preparing the challenges, but also way to assess skills and elements needed to prepare engaging situations for the target group.

This will include:

- learn how use digital, interactive materials and tools to offer more engaging learning possibility to (ex) VET students
- Learn how to foster (ex) VET students' soft skills via mentoring while on remote learning situations.
- VET students specific challenges in society and to foster their skills and competences
- techniques for engaging and communicating via social media and ICT
- what is the role and skills of a mentor especially in a virtual (learning) environment
- Encourage learning, develop a growth mind-set, guide discovery of topics, provide appropriate challenges and provide clear learning objectives targeting selected skills
- Define coaching and mentoring techniques, how to mentor and motivate participants, how to maximise the participants experiences

This project aims to:

Offer opportunities of professional development for VET TEACHERS, MENTORS AND TRAINERS and upgrade VET SYSTEM capacity to support VET students' in developing the necessary employability skills thus ensuring their smooth transition to the labour market.

Within the 24-month long project, the partners will

- Develop a new training possibility for VET Educators and foster their ability to ensure solid support to (ex) VET students looking for a job

- Develop a digital educational tool to offer (ex) VET students a new way to learn about how economic organizations work while developing skills and competences needed by the labour market, in a safe way
